Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This is in response to the appeal brief filed 2-21-2003. After consulting with the group supervisor, is recommended that previous rejection on 9-24-2002 should be withdrawn and to open prosecution on the claimed subject matter.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 2, 3, 6, 9 and 11 rejected under 35 U.S.C. 102(a) as being anticipated by Sawasaki et al. (U.S. Patent 5,838,365).

Sawasaki discloses a method for determining peak altitude of a moving object through a digital camera (col. 2, lines 34-52, Fig. 3-4), viewing the object (fig. 8-9), assessing the frames of data provided by the digital camera (col. 7, lines 17-39), determining the peak altitude by comparing data frame of the object (col. 29, lines 46-56, col. 30, lines 38-60), the process is automatic (fig. 24), processing within the frames of data (col. 7, lines 18-39), data based on time (fig. 17, 22, 27), successive frames of data, time interval (fig. 17).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sawasaki et al. (U.S. Patent 5,838,365) in view of McSheery et al. (U.S. Patent 6,324,296).

Sawasaki discloses a method including the subject matter discussed above except the frame rate is at least 30 HZ. McSheery discloses the frame rate is at least 30 HZ to increase pixel resolution and accuracy of analysis (col. 3, lines 9-16).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Sawasaki to have the frame rate is at least 30 HZ taught by McSheery in order to increase pixel resolution and accuracy of analysis (col. 3, lines 9-16).

Claim Objections

Claims 4, 5, 8, 10, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all the limitation of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: prior art fail to teach the determining airtime from the track, the use of firewire connection as computer link, the use of mounting a radio beacon through triangulation over time, determining the final speed prior landing, the frames of data at more than 60 HZ.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yano (U.S. Patent 5,905,848) and Kubo (U.S. Patent 5,404,163) show on their inventions related to method for determining peak altitude of a moving object through a digital camera.
